Annex A

Mass Balance Report

Gennaio 2025 · Girardot, Colombia

Submission reference	`RTF0-310125`
Reporting period	Gennaio 2025 (2025-01)
Plant	Girardot, Colombia
Feedstock	ELT — End-of-Life Tyres
Product	DEV-P100 — refined pyrolysis oil
Off-taker	Crown Oil UK
Regulator	UK DfT — LCF Delivery Unit
Generated	2026-05-15T06:46:37Z

Signed for and on behalf of OisteBio GmbH

Executive Summary

This Annex A presents the monthly mass balance for the **Gennaio 2025** production period at the Girardot, Colombia pyrolysis facility, operated by **OisteBio GmbH**. Input feedstock is **ELT — End-of-Life Tyres**; output product is **DEV-P100 — refined pyrolysis oil**, supplied to **Crown Oil UK** under the UK DfT — LCF Delivery Unit reporting framework.

Monthly aggregate

Metric	Value
Total input (ELT)	3 383 177,00 kg
EU-grade product (DEV-P100)	760 828,00 kg / 975 420,51 L
PLUS-grade product	1 308 624,16 kg / 1 528 766,54 L
C14 biogenic fraction	—
Closure (output − input)	**−339 863,81 kg (−10,05 %)**

Mass balance closure

RED — exceeds tolerance

|closure| ≥ 3% — outside ISCC EU acceptance band; mass-balance reconciliation required prior to submission.

Daily Detail — Gennaio 2025

Daily mass-balance rows, sorted by date ascending. Closure shown as output minus input. Densities applied: EU 0.78 kg/L, PLUS 0.856 kg/L.

Date	Input (kg)	EU (kg)	PLUS (kg)	EU (L)	PLUS (L)	C14 (%)	Closure (kg)

Supplier Breakdown — ELT Feedstock

Distribution of inbound feedstock by ISCC EU certified supplier. Shares computed as supplier total divided by aggregate monthly input.

Supplier	ISCC EU ref.	Total (kg)	Share	Proportion
ESENTTIA	CO222-00000027	1 549 811,00	45,81 %	
BIOWASTE	PL21990602701	1 152 775,00	34,07 %	
LITOPLAS	CO222-00000026	600 286,00	17,74 %	
≤5 TON	–	80 305,00	2,37 %	
Total		**3 383 177,00**	**100.00 %**	

Methodology & References

Mass balance reconciliation per **ISCC EU** (System Document 203, chain-of-custody mass-balance method) combined with the **UK RTFO RCF pathway** (Renewable Transport Fuel Obligation Guidance, Part One — Process, and Part Two — Carbon and Sustainability). Feedstock is **ELT — End-of-Life Tyres**, classified as **100 % fossil** end-of-life material under ISCC EU 203 (Recycled Carbon Fuel category, Annex II); the C14 biogenic fraction reported above reflects radiocarbon analysis of representative production samples and is used solely as an integrity cross-check.

Volumetric conversions apply nominal product densities at 15 °C: **EU-grade 0.78 kg/L** and **PLUS-grade 0.856 kg/L**, consistent with the operator product specifications and the densities registered in the platform `product_densities` table.

Closure is defined as (EU output + PLUS output) − input at constant product density and rounded to the kilogram. Per ISCC EU practice, monthly deviations below 1 % are accepted without remediation; deviations between 1 % and 3 % are inspected; deviations of 3 % or more trigger a full reconciliation review prior to release of the submission bundle. The closure semaforo on page 2 reflects this tiering.

This Annex A is cryptographically anchored to the cover letter of the submission bundle via the SHA-256 digest reported in the running footer (short prefix –).
