c/o Crown Oil Ltd — RTFO obligated supplier (intermediary)

Subject: Track A submission — RTFO RCF pathway, production period January-August 2025 (243 calendar days, 8 monthly reporting periods)

Dear Sir or Madam,

On behalf of **OisteBio GmbH** (Swiss GmbH, MWSt CHE-234.625.162), operator of the pyrolysis facility located in Girardot (Cundinamarca, Colombia), we hereby submit the present bundle under the Renewable Transport Fuel Obligation (RTFO) Track A process, in respect of the Recycled Carbon Fuel (RCF) pathway. The submission covers production volumes of **DEV-P100 refined pyrolysis oil** derived from **End-of-Life Tyres (ELT)** (end-of-life tyre material), processed during the **RTFO obligation year 2024/2025** reporting period (production period January-August 2025, 243 calendar days across 8 monthly reporting periods: January, February, March, April, May, June, July, August 2025). The feedstock is sourced exclusively from post-consumer waste tyres and is classified as RCF under the UK RTFO Guidance, Chapter 9.

The off-taker for the volumes covered by this submission is **Crown Oil Ltd (United Kingdom)**, which acts as the UK obligated supplier and will subsequently claim Renewable Transport Fuel Certificates (RTFCs) against the RCF volumes evidenced herein. Crown Oil Ltd is the sole UK buyer of the OisteBio DEV-P100 product; no European intermediaries are involved in the chain of custody for the period covered by this bundle. **OisteBio GmbH does not submit directly to the ROS system; all DfT-facing submissions are handled exclusively by Crown Oil Ltd.**

Bundle-level production totals — January-August 2025

Metric	Value	Notes
Total ELT input (feedstock)	25 081 244,000 kg	Sum across 8 monthly mass-balance reports
DEV-P100 EU output	7 324 312,522 kg	EU variant — combined all months
DEV-P100 PLUS output	10 180 640,722 kg	PLUS variant — combined all months
DEV-P100 EU — volume (litres)	9 502 018,67 L	Per conversion log; density per ASTM D4052
DEV-P100 PLUS — volume (litres)	11 815 842,51 L	Per conversion log; density per ASTM D4052
Syngas / process gas	1 431 443,61 m ³	Combusted on-site; not claimed as RCF volume

The Jan→Feb 2025 closing stock carry-over of **339,865 kg** is declared in Annex D (06_annex_d_stock_carryover/07_stock_carryover_jan_feb_2025.pdf). This is an intended operational carry-over fully documented and not a mass-balance discrepancy.

Enclosed with this letter you will find the evidence pack listed in the Evidence Index (09_evidence_index_FINAL.pdf), which cross-references every document to the specific DfT rejection point it addresses. The bundle is cryptographically anchored via MANIFEST.sha256 at the root of the bundle directory; every individual artifact carries its own SHA-256 side-car. The SHA-256 digests of the principal annexes are listed in the integrity table below.

Bundle integrity — SHA-256 anchors (principal annexes)

Annex / file	Path within bundle	SHA-256
Annex A — Mass Balance January 2025	01_annex_a_mass_balance/ 02_mass_balance_january_2025_FINAL.pdf	b581b92af537fd82a0467fd2d9047254469d9114 c390d001dc8a92a1e9699cd2

ISCC PoS Status (3 collecting points)	03_supplier_evidence/ 03_iscc_pos_status.pdf	dacfe62d88fbf5727171bbf76dda27879ac83128 7a4e8cb3f34b84c977a62709
Supply Chain Diagram	04_compliance/ 01_supply_chain_diagram.pdf	67c83299cea5f26c24c66c1ff1198b48bab667c0 14aaeb3b4cb2364a5b903673
Annex D — Stock Carry-over Jan→Feb 2025	06_annex_d_stock_carryover/ 07_stock_carryover_jan_feb_2025.pdf	fa24cc3c4e5b97d5a1ab22baf405441f67e31da eb4a7267d85998baeb432e51c

- **Annex A — Mass Balance reports x8** (January–August 2025), each with full daily detail and supplier breakdown: January 2025, February 2025, March 2025, April 2025, May 2025, June 2025, July 2025, August 2025;
- **Production conversion logs x8** — per-day kg-to-litre conversion for each production month;
- **Audit trail CSV exports x8** — cryptographic audit log per month (06_audit_trail_export_<month>_2025.csv);
- **Supplier evidence pack** — ISCC EU certificates, supply contracts, eRSV registry extracts (shared for all 8 months);
- **Compliance pack** — ISCC EU PoS status, supplier ISCC EU certificates (collecting-point chain), RTFO pathway declaration, supply-chain diagram;
- **Annex D — Closing Stock Carry-over Declaration** (January→February 2025), declaring the 339,865 kg physically retained at the Girardot facility at end of January 2025.

The compliance basis for this submission rests on (i) ISCC EU certification of the chain of custody from waste-tyre collection through pyrolysis to the finished DEV-P100 refined pyrolysis oil product, ensuring traceability and mass-balance integrity in accordance with ISCC EU System Document 203, and (ii) the UK RTFO RCF eligibility criteria as set out in the RTFO Guidance Part One (Process Guidance) and Part Two (Carbon and Sustainability). ELT (end-of-life tyre) feedstock RCF eligibility applies under UK RTFO only; no EU-market RCF claims are made under this submission.

Outstanding items

The following items are formally disclosed as residual gaps at the time of submission. Each item is documented in the bundle with its current status and Crown Oil / OisteBio commitments for post-acceptance closure.

- 1. Retrospective ISCC EU Proofs of Sustainability for three collecting points (Litoplas, Biowaste, Esenttia).** A formal request was submitted to the ISCC-accredited certifier in Colombia; the response is currently pending. Status is documented in Annex 03_supplier_evidence/03_iscc_pos_status.pdf. Crown Oil and OisteBio commit to forwarding the PoS chain to the Unit within 30 days of bundle acceptance, or to documenting refusal and engaging the fallback evidence procedure.
- 2. Supplier ISCC EU certificate library — included in this bundle.** Per-supplier ISCC EU collecting-point / waste-or-residue certificates (PDF originals from each certifier) are filed in folder 03_supplier_evidence/certificates/ and indexed in the Evidence Index. ANLA / Ministerio de Ambiente environmental permits are not required for this submission: the UK RTFO RCF pathway recognises ELT chain-of-custody via ISCC EU only, with no Colombia-side environmental-permit dependency on the DfT acceptance path.
- 3. ELT RCF eligibility — audit-gated, evidence included in this bundle.** End-of-life tyre feedstock is recognised as RCF under UK RTFO only. Eligibility is established by passing an ISCC audit against the chain-of-custody scope described in ISCC EU System Document 203, which OisteBio has completed for the period covered by this submission. No separate DfT designation letter is required; the audit evidence confirming eligibility is included within this bundle and cross-referenced in the Evidence Index. This item is disclosed for transparency and is not a blocking outstanding gap.
- 4. Closing stock of 339,865 kg retained at Girardot (January 2025 carry-over).** The closing inventory for January 2025 is documented as an intended operational carry-over, physically retained at the OisteBio Girardot facility and fully allocated to the February 2025 opening stock. Composition and reconciliation are documented in 06_annex_d_stock_carryover/07_stock_carryover_jan_feb_2025.pdf (Annex D). This carry-over fully accounts for the closure delta in the January Annex A mass balance and is not a defect.

We kindly request the Low Carbon Fuels Delivery Unit to acknowledge receipt of the present bundle and to confirm next procedural steps, including any clarification requests, additional evidence to be supplied, or scheduling of a technical pre-application meeting. Crown Oil Ltd, as obligated supplier, also offers to engage an independent ISCC verifier (Bureau Veritas Colombia / SGS Colombia) for a pre-audit of the 8-month evidence pack, on request from the Unit. We remain at your full disposal for any further information that may be required.

Yours faithfully,

For and on behalf of OisteBio GmbH

Paolo Ughetti
Managing Director
