c/o Crown Oil Ltd — RTFO obligated supplier (intermediary)

Subject: Track A submission — RTFO RCF pathway, production period January 2025

Dear Sir or Madam,

On behalf of **OisteBio GmbH** (Swiss GmbH, MWSt CHE-234.625.162), operator of the pyrolysis facility located in Girardot (Cundinamarca, Colombia), we hereby submit the present bundle under the Renewable Transport Fuel Obligation (RTFO) Track A process, in respect of the Recycled Carbon Fuel (RCF) pathway. The submission covers production volumes of **DEV-P100 refined pyrolysis oil** derived from **End-of-Life Tyres (ELT)** (end-of-life tyre material), processed during the **RTFO obligation year 2024/2025** reporting period (production period January 2025). The feedstock is sourced exclusively from post-consumer waste tyres and is classified as RCF under the UK RTFO Guidance, Chapter 9.

The off-taker for the volumes covered by this submission is **Crown Oil Ltd (United Kingdom)**, which acts as the UK obligated supplier and will subsequently claim Renewable Transport Fuel Certificates (RTFCs) against the RCF volumes evidenced herein. Crown Oil Ltd is the sole UK buyer of the OisteBio DEV-P100 product; no European intermediaries are involved in the chain of custody for the period covered by this bundle.

Enclosed with this letter you will find the evidence pack listed in the Evidence Index (09_evidence_index_FINAL.pdf), which cross-references every document to the specific DfT rejection point it addresses. The bundle is cryptographically anchored via MANIFEST.sha256 at the root of the bundle directory; every individual artifact carries its own SHA-256 side-car. The SHA-256 digests of the principal annexes are listed in the integrity table below.

Bundle integrity — SHA-256 anchors

Annex / file	Path within bundle	SHA-256
Annex A — Mass Balance January 2025	01_annex_a_mass_balance/ 02_mass_balance_january_2025_FINAL.pdf	9033aff878762584c0ab87a500cd169f6a929b83 96031854fa25fc4ca78d0c4c
Annex D — Stock Carry-over Explanation	01_annex_a_mass_balance/ 07_stock_carryover_explanation.pdf	40b11c71181a7d1968fd6f9041be769e3a8cbae bc63a4b8b520332ccd393ae4e
ISCC PoS Status (3 collecting points)	03_supplier_evidence/ 03_iscc_pos_status.pdf	d8d06716cac5ec8cfa631bc5d7ea37a27889a80 f129a6c204b1e556814d245e7
Production Conversion Log	02_ros_export/ 05_production_conversion_logs_january_2025.pdf	5f2804d948281682b8f4024202235737f6da511 d45a0ae14d8d5219dfd964e2
Audit Trail Export (CSV)	05_audit_trail/ 06_audit_trail_export_january_2025.csv	ae5dac33daf4bed388597cdd8d12b0b433f61c67 5dd8b0f61060fa9c5ae4ee21
Supply Chain Diagram	04_compliance/ 01_supply_chain_diagram.pdf	e64fec7b8c56ab56719d9eba62be3a25b8c5eb44 1404c70f0fb37ef6363ace68

- **Annex A — Mass Balance report** (signed), period January 2025, with full daily detail and supplier breakdown;

- **Production conversion log** — per-day kg-to-litre conversion for the 21 production days in January 2025;
- **Supplier evidence pack** — ISCC EU certificates, supply contracts, eRSV registry extracts;
- **Compliance pack** — ISCC EU PoS status (see Outstanding Items §1), ANLA feedstock-provider authorisations (Outstanding Items §2), RTFO pathway declaration, supply-chain diagram;
- **Audit trail** — cryptographic database snapshots and audit-log CSV export;
- **Annex D — Closing Stock Carry-over Declaration**, declaring the 339,865 kg physically retained at the Girardot facility at month-end.

The compliance basis for this submission rests on (i) ISCC EU certification of the chain of custody from waste-tyre collection through pyrolysis to the finished DEV-P100 refined pyrolysis oil product, ensuring traceability and mass-balance integrity in accordance with ISCC EU System Document 203, and (ii) the UK RTFO RCF eligibility criteria as set out in the RTFO Guidance Part One (Process Guidance) and Part Two (Carbon and Sustainability).

Outstanding items

The following items are formally disclosed as residual gaps at the time of submission. Each item is documented in the bundle with its current status and Crown Oil / OisteBio commitments for post-acceptance closure.

1. **Retrospective ISCC EU Proofs of Sustainability for three collecting points (Litoplas, Biowaste, Esenttia).** A formal request was submitted to the ISCC-accredited certifier in Colombia; the response is currently pending. Status is documented in Annex 03_iscc_pos_status.pdf. Crown Oil and OisteBio commit to forwarding the PoS chain to the Unit within 30 days of bundle acceptance, or to documenting refusal and engaging the fallback evidence procedure.
2. **ANLA environmental permits — apostille / consular legalisation in progress.** Spanish-language copies of ANLA / Ministerio de Ambiente permits for the three principal feedstock providers are included in folder 04_compliance/feedstock_provider_authorisations/. Consular legalisation (UK consulate, Bogotá) and sworn EN translations are in progress; ETA **2026-07-29**. Legalised originals will be transmitted within 30 days of bundle acceptance and no later than the stated ETA.
3. **Closing stock of 339,865 kg retained at Girardot.** The closing inventory for January 2025 is physically retained at the OisteBio Girardot facility, awaiting downstream allocation. Composition is documented in 07_stock_carryover_explanation.pdf (Annex D). This carry-over fully accounts for the closure delta in the Annex A mass balance and is not a defect.

We kindly request the Low Carbon Fuels Delivery Unit to acknowledge receipt of the present bundle and to confirm next procedural steps, including any clarification requests, additional evidence to be supplied, or scheduling of a technical pre-application meeting. Crown Oil Ltd, as obligated supplier, also offers to engage an independent ISCC verifier (Bureau Veritas Colombia / SGS Colombia) for a pre-audit of the January 2025 evidence pack, on request from the Unit. We remain at your full disposal for any further information that may be required.

Yours faithfully,

For and on behalf of OisteBio GmbH
