

Annex — ISCC PoS Status

Retrospective ISCC PoS Request Status

January 2025 · Girardot, Colombia

Submission reference	RTF0-310125
Reporting period	January 2025 (2025-01)
Plant	Girardot, Colombia
Collecting points covered	Litoplas, Biowaste, Esenttia (CO)
Requests sent	3 (2026-05-15)
Responses received as of Day 6	0 of 3
Regulator	UK Department for Transport — RTFO / LCF Delivery Unit
Generated	2026-05-20T00:00:00Z

1. Retroactive ISCC PoS Requests — Day 1 Outbound

Pursuant to §5 item 1 of the 5-working-day activity plan (RTFO-310125), **OisteBio GmbH** formally requested retrospective ISCC EU Proofs of Sustainability for the January 2025 input volumes from the three verified collecting points, addressed to the ISCC-accredited certifier(s) of record in Colombia. Requests were dispatched on **2026-05-15** (Day 1) with Crown Oil Limited in CC as the UK obligated supplier.

The scope of every request is strictly limited to the January 2025 production period; no historical or forward periods are implicated. Volumes per collecting point are reproduced from the operator's digital ingest ledger (see Annex A — Mass Balance), and the chain-of-custody identifier of each existing supplier ISCC EU certificate is referenced in the request body so the certifier can bind the retrospective PoS to the same mass-balance methodology.

Requests dispatched — one row per collecting point

#	Collecting point	Certifier addressed	Contact email	Date sent	Jan 2025 kg	Scope
1	LITOPLAS	Bureau Veritas Colombia S.A.S.	iscc.colombia@bureauveritas.com	2026-05-15	600 286,000	Retrospective ISCC EU PoS for January 2025 of inputs, bound to existing CoC certificates CO222-0000000 CO222-0000000 ES216-202540 ES216-202680
2	BIOWASTE	Bureau Veritas Colombia S.A.S.	iscc.colombia@bureauveritas.com	2026-05-15	1 152 775,000	Retrospective ISCC EU PoS for January 2025 of inputs, bound to existing CoC certificate PL2199060270 (BIOWASTE dedicated).
3	ESENTTIA	SGS Colombia S.A.S.	iscc.co@sgs.com	2026-05-15	1 549 811,000	Retrospective ISCC EU PoS for January 2025 of inputs, bound to existing CoC certificates CO222-0000000 CO222-0000000 ES216-202680
Total Jan 2025 volume under retrospective PoS request					3 302 872,000	

Each request quotes the relevant existing supplier-level ISCC EU certificate as the chain-of-custody anchor and asks the certifier to issue a retrospective per-batch PoS aligned to

the January 2025 daily-input ledger. Crown Oil Limited (UK obligated supplier) is in copy on every request. Source-of-truth references for the email timestamps are retained in the OisteBio operator log; bundle audit trail is available on reasonable notice to the Unit.

2. Certifier Response Status — as of Day 6

The following table summarises the response status of each retrospective PoS request as of **2026-05-20** (Day 6, bundle freeze window prior to ROS submission). Where a certifier has not replied within the working-day window, the row is marked **PENDING** and the gap is carried into the cover-letter Outstanding Items section with the 30-day post-acceptance commitment from §3 below.

#	Collecting point	Status	Response date	Outcome / content	Attached doc
1	LITOPLAS	PENDING	—	No reply received as of 2026-05-20. Follow-up email dispatched 2026-05-19 (Day 5) per §3 of the 5-working-day activity plan. Gap declared in cover letter Outstanding Items §5 item 1.	n/a — no response document received
2	BIOWASTE	PENDING	—	No reply received as of 2026-05-20. Follow-up email dispatched 2026-05-19 (Day 5) per §3 of the 5-working-day activity plan. Gap declared in cover letter Outstanding Items §5 item 1.	n/a — no response document received
3	ESENTTIA	PENDING	—	No reply received as of 2026-05-20. Follow-up email dispatched 2026-05-19 (Day 5) per §3 of the 5-working-day activity plan. Gap declared in cover letter Outstanding Items §5 item 1.	n/a — no response document received

Gap declaration. Any row above marked Pending as of bundle freeze is carried into the cover-letter Outstanding Items section under the wording agreed in §5 item 1 of the 5-working-day activity plan. The absence of an in-window response is recorded but does not block the Day 7 ROS submission, consistent with the §6 risk-register mitigation for "Certifier ISCC non risponde a richiesta PoS entro 20 maggio" (probability High, impact Medium).

3. Commitment — Post-acceptance Delivery

OisteBio GmbH, in concert with **Crown Oil Limited** (UK obligated supplier of record), hereby commits to deliver to the UK Department for Transport — RTFO / LCF Delivery Unit the formal retrospective ISCC EU Proofs of Sustainability for the **January 2025** input volumes covered by this submission within **thirty (30) calendar days** of formal DfT acceptance of the RTFO-310125 bundle.

Where the certifier ultimately declines to issue a retrospective PoS for a given collecting point, OisteBio GmbH commits to (i) documenting the refusal with the certifier's written statement, (ii) engaging the fallback non-ISCC evidence procedure described in the UK RTFO Guidance Part Two (Carbon and Sustainability), and (iii) notifying the Unit within five (5) working days of receipt of the refusal.

Crown Oil Limited further offers, on a contingent basis and at the Unit's discretion, to engage an independent ISCC verifier (Bureau Veritas Colombia or SGS Colombia) for a pre-audit of the retrospective PoS evidence pack once issued. Engagement can be initiated within five (5) working days of Unit confirmation.

4. Self-anchoring SHA-256 Digest

This document is cryptographically self-anchored via the SHA-256 digest reported in the running footer (short prefix 000000000000). The full digest is reproduced in the bundle's MANIFEST.sha256 at root and cross-listed in 09_evidence_index.pdf. A side-car file 03_iscc_pos_status.pdf.sha256 accompanies this PDF and is computed by the deterministic renderer (backend.app.services.pdf_renderer); the renderer guarantees byte-identical output across re-runs so the digest in the cover letter footer remains valid.
