

OisteBio GmbH

Recycled Carbon Fuels — DEV-P100 pyrolysis oil

Submission Ref. **RTFO-310825**

Reporting period: January 2025 – August 2025

Generated: 2026-05-21T00:00:00Z

Supply chain — January 2025 - August 2025

End-to-end traceability from end-of-life tyre (ELT) collection through catalytic pyrolysis at the OisteBio Girardot facility, to the UK obligated supplier under the RTFO RCF pathway. All inbound flows are governed by a single ISCC EU mass-balance system boundary; per-supplier chain-of-custody refs and volumes are reconciled monthly in Annex A (Mass Balance).

COMPLIANCE PATHWAYS

- ISCC EU mass balance — chain-of-custody method per ISCC EU System Document 203; per-supplier PoS references reproduced in Annex A.
- UK RTFO RCF pathway — Renewable Transport Fuel Obligation Guidance, Parts One & Two; submission to UK DfT Low Carbon Fuels Delivery Unit.
- Submission reference: **RTFO-310825** — reporting period January 2025 – August 2025.

FEEDSTOCK & PRODUCT

- Feedstock: end-of-life tyres (ELT), 100 % fossil post-consumer material under ISCC EU 203 (Recycled Carbon Fuel category, Annex II).
- Process: catalytic pyrolysis — OisteBio Girardot SAS, Colombia.
- Output product: DEV-P100 refined pyrolysis oil (OisteBio brand).
- Off-taker: Crown Oil Limited (UK) — sole buyer for this submission.

SUPPLIER BREAKDOWN (8)

- All inbound volumes flow from ISCC EU certified collecting points or self-declared ≤5 t/month deliveries (ISCC self-declaration regime).
- Aggregated under a single Girardot intake stream and reconciled monthly under one ISCC mass-balance group.
- No EU-based collecting points or intermediate storage participate in this supply chain; flows direct to UK obligated supplier.
